

AmeriChem Rough-Out Plating Cell Station

AmeriChem's Rough-Out Plating Cell Station is the solution for metal recovery you've been waiting for. The thick WPP tank; equipped with 6 anode bars and 3 cathode bars; has 36 new titanium anode baskets and 36 new napped PP anode bags. Two new removable cell dividers carefully placed reduce stray electrical currents between cells, and fire-retardant materials protect your safety.

The specifications listed below were initially configured for panel plating, but can be modified for many different applications.

Specifications	
Dimensions	
WPP Tank	84" W x 46" L x 48" D
Steel Plates	15" W x 24" L x 1/8" Thick (plates come with 4b finish)
Exhaust Tolerance	4020 CFM (150 CFM x 26.8 sq. ft.)
Power Configuration	3 x 500A @ 10V
